The ACP Pipeline

Can Be Stopped!!

Dear RCC supporter,

We are now less than one month away from a critical decision that could prevent the Atlantic Coast Pipeline (ACP) from being built!! The ACP will carry fracked natural gas under high pressure from West Virginia, across Virginia, and all the way to the coast of eastern North Carolina.

Governor Roy Cooper of North Carolina can stop the entire boondoggle for Duke Energy and Dominion Power by denying a water quality permit for the

ACP on December 15. Gov. Cooper has already opposed off-shore oil drilling. Now we need you to help him stop the ACP in its tracks!

You can help stop a climate change, ecological and  **human health disaster. Will you help by chipping in \$5 or \$10 or even \$100 to our campaign to halt the ACP today? All donations will be matched (2X), up to \$12,000, by a generous RCC Board member!**

The RCC has organized growing opposition to the ACP with our major report, **Blast Zone**, on the ACP's dangers to people, the land, and global climate change. Our staff has marched in opposition along the pipeline route through Virginia. We have organized e-mail and postcard campaigns, call-ins to the Governor's office, and campus events throughout North Carolina. But we must do more in just a few more weeks!!

Stopping the Atlantic Coast Pipeline will send shudders through the fossil fuel industry. It will signal a turn to sanity and science in North Carolina that will be noticed worldwide!

 **Please send your best donation now so we can keep up the momentum toward victory! Chip in \$5 or \$10, or even \$100 right now! Remember, all gifts, large or small will be doubled!**

We can stop the ACP. We can stop one more fossil fuel boondoggle, and we can show the world that the resistance is starting to win!!

 Thank you!

Robert K. Musil, Ph.D., M.P.H.
President and CEO

The Rachel Carson Council, founded in 1965, is the national environmental organization envisioned by Rachel Carson to carry on her work after her death. We promote Carson's ecological ethic that combines scientific concern for the environment and human health with a sense of wonder and reverence for all forms of life in order to build a sustainable, just, and peaceful future.
